

Galaxies

R meet

B at Cabo de Gata

S

Organizers:

Christina Thöne
Antonio de Ugarte Postigo
Javier Gorosabel
José M. Vílchez
Sebastian Sanchez
Carolina Kehrig
Ricardo Amorín

Topics:

GRB, SN & WR hosts
Diversity of GRBs and SNe
Life and death of massive stars
Influence of massive stars on their environment
Galaxy evolution
Starburst galaxies
Star-formation triggers
High redshift star-forming galaxies
Stellar populations and their evolution
Evolution of star-formation and chemical abundances
IFS and other spatially resolved observing techniques
Multi-wavelength observations of star-forming galaxies
Modeling of stellar evolution and end states of massive stars

September 23-27, 2013
